

Using Turnitin LTI 1.1 with a Canvas Rubric

1. Create your assignment with a Submission Type of something other than “External Tool”. Don’t worry we will go back and change this after the rubric has been associated with the assignment.

2. Save the assignment

3. Assign a Canvas Rubric to the assignment by selecting the add Rubric button.

4. Configure a new Canvas Rubric and select Create Rubric or search for one you have already created by selecting [Find a Rubric](#).

A screenshot of the Canvas Rubric configuration form. The form has a title field with 'Some Rubric' and a 'Find a Rubric' link. Below is a table with three columns: 'Criteria', 'Ratings', and 'Pts'. The 'Criteria' column has a 'Description of criterion' row. The 'Ratings' column has '5 pts Full Marks' and '0 pts No Marks' rows. The 'Pts' column has a '5 pts' row. Below the table are checkboxes for 'I'll write free-form comments when assessing students', 'Remove points from rubric', 'Don't post Outcomes results to Learning Mastery Gradebook', 'Use this rubric for assignment grading', and 'Hide score total for assessment results'. At the bottom are 'Cancel' and 'Create Rubric' buttons.

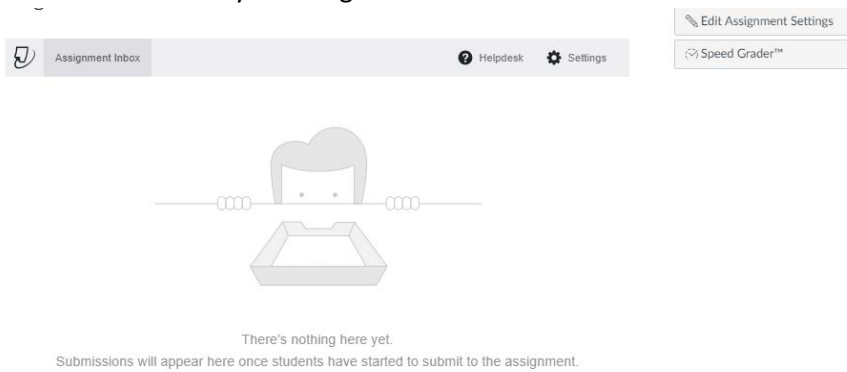

5. Now that the rubric has been associated with the assignment we can go back and change the Submission Type to External Tool and setup Turnitin to be used with this assignment.

- a. Select Edit
- b. Submission Type - select External Tool
- c. Configure External Tool – select Turnitin LTI 1.1

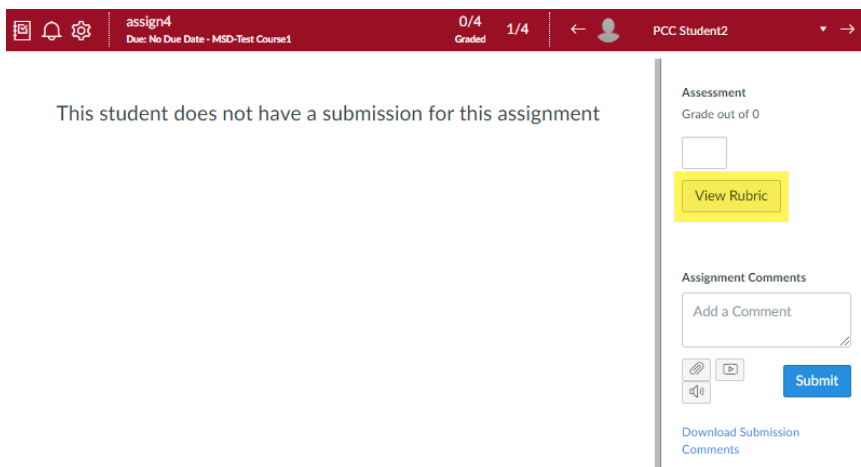

A screenshot of the 'Configure External Tool' dialog in Canvas. The dialog has a title bar with a close button. The main content area has a text input field with a placeholder 'Select a tool from the list below, or enter a URL for an external tool you already know is configured with Basic LTI to add a link to it to this module.' Below the input field is a list of tools: 'SmartSparrow', 'SoftChalk', 'Turnitin LTI 1.1', and 'Tutorline'. The 'Turnitin LTI 1.1' tool is selected. At the bottom are 'Cancel' and 'Select' buttons.

6. **Save (or Save & Publish)** the Assignment.

7. You will notice that your assignment screen looks different and the Canvas Rubric area has disappeared.

8. If you click on Speed Grader you will see a View Rubric button and can verify the Rubric is actually still associated with the assignment.

****Tip – If you click on Speed Grader and get a screen with the message:**

“Sorry, there are either no active students in the course or non are gradable by you”

go into your course under Student View and then Leave Student View. This will create a Test Student in your gradebook and will allow you to open SpeedGrader.

Managing Rubrics

To Add, Delete, or Edit Rubrics you can access them through the Outcomes link in the Course Navigation.
